Bug Report for OWASP Juice Shop

Home Page

Images under product cards

Issue: Images are not equally sized and do not fit into the frame.

Expected Behavior: Images should be uniformly sized to fit the product card frame.

Add to Basket Alignment

Issue: The alignment of the 'Add to Basket' button is inconsistent.

Expected Behavior: The button should maintain proper alignment across all product cards.

Success Messages

Issue: Success messages are not hidden after a given period.

Expected Behavior: Success messages should disappear automatically after a few seconds.

Application Crashes

Issue: The app crashes frequently with an 'Application Error' message.

Expected Behavior: The app should function without frequent crashes.

Sold Out Products

Issue: 'Add to Basket' button is not disabled or hidden for sold-out products.

Expected Behavior: The button should be disabled or hidden for sold-out items.

Single Quantity Products

Issue: 'Add to Basket' button remains active for products with only one quantity available.

Expected Behavior: The button should be disabled once the last item is added to the basket.

Product Details Popup

Reviews Quantity Display

Issue: Reviews are displayed without quantity for a few seconds.

Expected Behavior: The quantity should always be shown with reviews.

Submit Button Alignment

Issue: The submit button for reviews partially hides when the reviews section is expanded.

Expected Behavior: The button should be fully visible.

Like Button Jerk

Issue: Clicking the like button causes a visual jerk.

Expected Behavior: Smooth transition without any visual disturbance.

Product Image Enlargement

Issue: No option to enlarge the product image.

Expected Behavior: Provide an option to view larger product images.

Unlike Review Option

Issue: Missing option to unlike a liked review.

Expected Behavior: Add an option to unlike reviews.

Review Dislike Option

Issue: No option to downvote or dislike a review.

Expected Behavior: Add a dislike button for reviews.

Saving New Review Jerk

Issue: A jerk occurs upon saving a new review.

Expected Behavior: Smooth save operation without visual disruption.

Basket Page

Quantity Increase

Issue: Quantity cannot be increased for certain products even when stock is available (e.g., Melon Bike).

Expected Behavior: Allow increasing quantity up to the stock limit.

Decrement Functionality

Issue: Decrement does not work when quantity is 1. It should either be disabled or prompt for product removal confirmation.

Expected Behavior: Disable the button at 1 or prompt for confirmation before removing the item.

Delete Confirmation

Issue: Deleting a product does not require confirmation.

Expected Behavior: Provide a confirmation dialog before deleting.

Bonus Calculation

Issue: Bonus always remains 0 for orders.

Expected Behavior: Correctly calculate and display bonuses.

Account Page

Profile Picture Slash

Issue: An extra slash (\) appears below the profile picture.

Expected Behavior: No unnecessary symbols should be displayed.

Profile Picture Upload

Issue: Application crashes when uploading a profile picture.

Expected Behavior: The upload process should complete without crashes.

Link Image Using URL

Issue: Linked images do not display.

Expected Behavior: Linked images should be displayed correctly.

Change Language

Issue: Flags are not aligned, and language names are missing in English brackets.

Expected Behavior: Align all flags and provide language names in English brackets.

Recycle

Issue: Submit button remains disabled; form does not function properly, and quantities remain unchanged.

Expected Behavior: Enable submit button, fix form functionality, and update quantities correctly.

Saved Addresses

Issue: No validation for city, country, state, or mobile number. Refreshing causes delays in displaying addresses.

Expected Behavior: Add validations and reduce delay after refreshing.

Request Data Export

Issue: Captcha validation issues, disabled export buttons, JSON export opens in a new tab.

Expected Behavior: Fix captcha issues, enable export buttons, and ensure JSON downloads as a file.

Payment Options

Issue: Limited expiry years, ability to fake credit cards, page refresh causes jerks.

Expected Behavior: Extend expiry years, add validations, and ensure smooth refresh.

Digital Wallet

Issue: Fake card payments, delayed validations, balance not updating, crypto wallet errors.

Expected Behavior: Add validations and fix wallet errors.

Last Login IP

Issue: IP address always shows 0.0.0.0.

Expected Behavior: Display the correct IP address.

Change Password

Issue: Incorrect error message when the current password is wrong.

Expected Behavior: Display appropriate error messages.

2FA Configuration

Issue: QR code remains the same, and Google Authenticator does not work.

Expected Behavior: Generate unique QR codes and fix Google Authenticator.

Additional Pages

Checkout Order Summary

Issue: The Twitter link is broken.

Expected Behavior: Fix the Twitter link.

Complain Form

Issue: Selected file cannot be removed.

Expected Behavior: Add a remove file option.

About Us

Issue: Contains fake lorem ipsum text.

Expected Behavior: Replace lorem ipsum with actual content.

Photo Wall

Issue: Some photos are broken, rows are misaligned.

Expected Behavior: Fix broken images and align rows properly.

Customer Feedback

Issue: 0-rating feedback can be given after moving the slider but not before.

Expected Behavior: Consistent feedback behavior before and after moving the slider.
